

# WHO HAS ONE MORE?

## Materials:

- Deck of UNO™ or other numbered cards (using 1 - 9)

Curriculum Code:

Math Concept:

Understand the relationship between numbers and quantities; connect counting to cardinality

Number of Students:

WHOLE GROUP

## Directions:

Distribute the cards among your class. Ask the question: Who has one more than (Insert a number here)? The children who have this particular card will stand and put their card in a basket. Then the teacher will ask the question again with another number. The game will continue until one child has placed all his/her cards in the basket or until everyone has placed all their cards in the basket.

**Who has one more than 6?**
